EDUCATION

International Islamic University Islamabad

Islamabad

Bachelor of Science in Computer Science (BSCS)

August 2022

- GPA: 3.79 (Distinction)
- Position: 2nd Position Holder

TECHNICAL SKILLS

- **Frontend:** Angular (latest), TypeScript, RxJS, NgRx, Redux, Angular Material, React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, TanStack
- **Backend & APIs:** Node.js, Express.js, Firebase, SQL, RESTful APIs, GraphQL, JWT Authentication
- **Mobile:** Flutter, Dart
- **Testing:** Vitest, Jest
- **AI Tools:** Claude, Codex, Cursor
- **Tooling:** Git, GitHub, CI/CD, Docker

WORK EXPERIENCE

Scala Teams LLC

Islamabad

Full Stack Engineer

May 2024 - Present

- Develop and maintain a high-performance e-commerce portal using the latest versions of Angular and TypeScript, improving reliability and reducing regressions across releases.
- Owned the middleware codebase and storefront, enabling the full e-commerce portal functionality to run reliably end-to-end for live customer traffic.
- Integrated Sanity Studio, ML APIs, lazy loading, image search, theming, voice search, and the VSF-UI library, expanding product discovery options and improving how quickly products render for users.
- Implemented GraphQL queries and mutations, payment integration (Google Pay, PayPal), and SendGrid transactional email templates, enabling a complete purchase-to-confirmation experience and reducing failed checkout drop-offs.
- Built wrapper APIs abstracting service calls behind clean GET/POST/PUT endpoints, paired with NgRx Store and the Facade Pattern, cutting state-related bugs and making feature development faster and more maintainable.
- Integrated Cloudinary APIs (gallery, image viewer) and OpenSearch endpoints, improving media loading and search accuracy for product browsing.
- Achieved 100% code coverage with unit and snapshot tests using Vitest and Jest, catching defects before release and increasing deployment confidence.
- Delivered the complete e-commerce flow from add-to-cart through checkout, payment, and order success, cutting product render time by roughly 30% via RxJS and lazy loading.
- Use AI tools (Claude, Codex, Cursor) to prototype features and speed up development cycles.

ASM Associates LLC

Islamabad

Frontend Developer

February 2023 - April 2024

- Built the front end of a Tax Filing System from the ground up with Angular and Angular Material across 15+ screens, establishing a consistent component structure that sped up subsequent UI development.
- Built complex Reactive Forms with dynamic form arrays, custom validations, and structured data workflows, reducing form submission errors by roughly 40%.
- Managed asynchronous operations and application state using RxJS, ensuring responsive, reliable UI behavior across data-heavy screens.

- Integrated REST APIs with HTTP interceptors and centralized error handling, cutting duplicate error-handling code by roughly 50% and improving API communication.
- Engineered reusable services and modular components, delivering a production-ready, scalable system and reducing effort needed to ship new features.

Trillo Inc.

Software Engineer

Rawalpindi

April 2022 - February 2023

- Built Angular front ends across 5+ client web applications with REST API integrations using HTML5, CSS3, and modern JavaScript (ES6+), delivering consistent UIs that reduced cross-project development effort.
- Built cross-platform mobile applications with Flutter for Android and iOS from a single codebase, cutting development and maintenance effort by roughly 40% versus building natively for each platform.
- Customized enterprise components such as the Syncfusion calendar for client-specific scheduling systems, meeting bespoke requirements without building from scratch.
- Integrated AI chatbot functionality and delivered client-focused solutions with optimized performance and responsive design, improving user engagement and reducing manual support load.

ACHIEVEMENTS

- [Superstar of the Month](#) — recognized for outstanding individual performance and contribution.
- [Ambassador at Opportunities Circle](#) — awarded for building a stronger community and helping individuals access new opportunities.
- [Star of IIUI](#) — awarded for outstanding academic performance as one of the top-ranking students of the batch.
